Professional Services:
ERP Implementation

Our experts will guide you through your ERP implementation to define clear roles, establish best practices and set you up for success with one of two different implementations.

STANDARD

- Better for larger companies
- Go Live in an average of 6-9 months
- Implement all the ERP modules you choose
- Appropriate plan for when specific customizations, advanced functionality or more advanced processes are required
- Appropriate plan for those coming from a different ERP system
- Suitable for those with an internal IT resource to help with data conversion

FAST TRACK

- Better for smaller companies
- Go Live in an average of 90-120 days
- Initially implement & learn the core ERP modules
- Quicker Time to Value (TTV) with continued growth into advanced modules
- Appropriate implementation method for those that do not need customization or advanced functionality
- Good for those coming from non-ERP environments like Excel or QuickBooks
