

# Professional Services: AI Data Migration

Choose how you get your data into Global Shop Solutions ERP. Genii Assist gives you three flexible paths to clean, ERP-ready data, less risk and a faster Go Live.

## TIER 1 – BASIC DATA PREP

### Customer-Led Extraction & Cleaning

- You perform data extraction & initial cleanup
- We provide templates, AI mapping & load prep
- Single iteration with basic validation
- Ideal for clean data & capable internal teams

## TIER 2 – ENHANCED DATA MIGRATION

### Complex Transformations Included

- You handle extraction & initial cleanup
- We execute AI-powered, complex data transformations
- Includes BOMs, routers & part cross references
- Multiple iterations & limited history loading
- Ideal for more complex data environments

## TIER 3 – PREMIUM/CONCIERGE ETL

### We Fully Own Data Migration

- We manage extraction, cleaning, transformation & loading
- AI + manual data remediation
- Multi-system & multi-site support
- Full reconciliation & validation cycles
- Delivered as a managed, concierge service

## BENEFITS

- Improve data accuracy & usability from day one
- Accelerate ERP implementation timelines
- Reduce risk in a critical phase of deployment
- Let AI minimize manual effort & rework
- Choose the level of support that fits your team
