

Professional Services: Development as a Service (DaaS)

Get a developer dedicated to your long-term or large-scale coding needs to create and deliver a tailored and detailed scope, timeline and project.*

- Take a holistic approach vs. managing individual RFQs for each coding project
- Get one-on-one attention from a dedicated team of experts either in-person or remote
- Work with the same team until all requirements are fully met
- Engage with the developer regularly to ensure all goals are achieved & projects are completed
- Gather list of wants & needs for your project
- Walk through discovery with our ERP expert analyst & developer
- Based on the walk through, get a spec & project proposal with scope, timeline, services & costs
- Once proposal is approved, our dedicated team works with you through project completion

BENEFITS

- Reduced queue time with a flexible & dynamic approach
- Simplify the custom development process
- You control your plan & can make changes as you see fit
- Complete transparency on the risks & progress
- Exceptional engagement with your dedicated developer

**This service is not applicable for one-off tailored coding projects.*
